OUR EXPERTISE

With a skilled team of professionals, we offer extensive expertise across various digital disciplines:

Web Development

We create user-friendly, responsive websites that provide a seamless experience across all devices. From corporate sites to e-commerce platforms, our development solutions are designed to meet the highest standards of performance and security.

Mobile App Development

We develop high-quality mobile applications for iOS and Android platforms, ensuring engaging and intuitive user experiences that align with your business goals.

AI & Machine Learning Solutions

We harness the power of artificial intelligence and machine learning to create innovative applications that optimize processes, enhance user experiences, and drive data-driven decision-making.

E-Commerce Solutions

We design and develop robust e-commerce platforms that drive sales and improve customer satisfaction, integrating secure payment systems and seamless user experiences.

Cloud Solutions

We provide scalable cloud services using platforms like AWS, focusing on architecture, migration, and management. Our DevOps practices streamline development and operations for faster deployment and reliable software delivery.

Digital Marketing

Our comprehensive digital marketing services include SEO, social media management, content marketing, and paid advertising. We craft strategies that increase visibility, drive traffic, and convert visitors into loyal customers.

SEO

NFTHive is a leading NFT marketplace specializing in the sale of NFTs on the WAX blockchain. When Enigma IT took on this project, we encountered significant performance issues and a lack of user-friendly UI/UX design.

Our team implemented a comprehensive redesign to enhance the overall user experience, focusing on intuitive navigation and visually appealing layouts. Additionally, we optimized the site's performance, ensuring faster load times and smoother interactions. This transformation positioned NFTHive as a competitive player in the NFT marketplace, providing users with a seamless platform for buying, selling, and trading digital assets.

APP

Vencru is a multimillion-dollar company for which we developed a comprehensive digital solution. The frontend of their website is built on WordPress, providing an intuitive and engaging user experience. The underlying system utilizes the MERN stack (MongoDB, Express.js, React, and Node.js) and operates on AWS architecture, ensuring scalability and reliability.

We take pride in having created their entire systems, which streamline their operations and enhance their service delivery. Our work with Vencru showcases our ability to deliver high-quality, integrated solutions tailored to the unique needs of successful businesses.

FindrHost is a travel experience website developed for an Australian client using the MERN stack (MongoDB, Express.js, React, and Node.js). The platform features a user-friendly interface that allows travelers to easily explore and book various services.

We hosted the site on AWS architecture, leveraging AWS Lambda for efficient serverless computing. This setup ensures scalability and quick response times, making it capable of handling fluctuating traffic seamlessly. The FindrHost project demonstrates our expertise in creating robust, scalable web applications tailored to meet the unique needs of the travel industry.

Maintanance

We had the opportunity to work with Eitan Bernath, a renowned TikTok influencer and food maker, by fixing and managing his website on AWS. Our team focused on optimizing the site for performance and reliability, ensuring a seamless experience for his growing audience.

By leveraging AWS architecture, we enhanced the site's scalability and security, allowing Eitan to effectively showcase his culinary creations. This project reflects our commitment to supporting influencers and creators in maximizing their online presence.
